March 15, 2011**

### **Halstab Division of Hammond Group, Inc. Announces Price Increase for entire PlastiStab Product Line Effective March 15, 2011**

The increase in price is the result of rising raw material cost. Liquid mixed metal stabilizer prices will increase in a range from 10-25 cents/lb. Powder mixed metal stabilizer prices will increase in a range from 10-30 cents/lb. Tin stabilizer prices will increase from 20 cents to \$1.00/lb.

The increase in price for each product will directly reflect the increase in raw material cost for that stabilizer.
