Halstab Mixed Metal Stabilizers Price Increase Announcement

Halstab is announcing a price adjustment for liquid and powder mixed metal stabilizers. This increase is the direct result of raw material costs that have been rising over the past several months. The magnitude of the price changes will be variable and will be dependent on the raw materials used to formulate each product. This increase will take effect on July 1, 2011 as contracts allow. The average price increase for the PlastiStab line of liquid mixed metal stabilizer is \$0.15/lb and for PlastiStab powders the average price increase is \$0.10/lb.

We are doing our best to aggressively contain raw material cost to provide our customers with the best value in the market. We appreciate your business.
